

Introducing Invincible Catamarans and Their Patented Morelli & Melvin Hull Design

In the realm of power catamarans, Invincible Catamarans stand out as a shining example of innovation, excellence, and unwavering commitment to providing fishermen with an unmatched experience on the water. At the heart of our success lies their groundbreaking Catamaran design—the patented Morelli & Melvin hull—ushering in a new era of performance and versatility in Catamaran performance.

Invincible Boats are a renowned Center Console boat builder, recognised for their dedication to quality, craftsmanship, and the relentless pursuit of pushing the boundaries of what's possible on the water. Established on the foundations of Premium Saltwater Fishing, the company has built a sterling reputation for manufacturing boats that seamlessly combine thrilling performance, comfort, and safety.

The Morelli & Melvin Hull: A Masterpiece of Innovation

Central to Invincible Catamarans' success is the Morelli & Melvin hull design, a patented innovation that has set a new standard for catamaran performance. This revolutionary hull design is the brainchild of the world-renowned naval architects, Gino Morelli & Pete Melvin, and it represents a pinnacle of their expertise.

The Morelli & Melvin hull design is characterised by its unique combination of efficiency, stability, and speed. Its catamaran configuration offers a significant advantage in terms of reduced resistance in the water, translating into remarkable fuel efficiency and high-speed capabilities. This advanced semi-asymmetric design also allows the hull to lean into the turn; that's the Invincible difference that makes our catamarans unique.

Performance Redefined

One of the key features of the Morelli & Melvin hull is its exceptional stability, especially in challenging sea conditions. The design incorporates a high chine to tunnel height for the catamaran cushion of air known for enhancing stability, allowing passengers to enjoy a smooth and comfortable ride even in rough waters. This stability also means a safer and more secure experience for all aboard, making Invincible Catamarans an excellent choice for families and serious boaters alike.

Endless Versatility

Beyond its incredible speed and stability, the Morelli & Melvin hull design allows for a remarkable level of versatility. Invincible's pedigree of Offshore Sportsfishing means they customized to cater to a wide range of boating preferences, from more comfortable and leisurely cruising to a fast commuter as well as fishing adventures. The spacious and thoughtfully designed interiors offer luxurious comfort, with a layout that suits every boating lifestyle.

A Commitment to Excellence

Invincible Catamarans' commitment to excellence, epitomized by the Morelli & Melvin hull design, has made them a trailblazer in the American Center Console segment industry. Our catamarans are not just vessels; they are an embodiment of precision, performance, and passion for the open water.

One Ride is all it takes to discover the Invincible Difference!
